

On page 7, line 23, please insert Alternatively, the embodiment of Fig. 2a would

also result in an asymmetric structure i.e.: the separation S_1 between the two conductors in a pair is smaller than the separation S_2 between the two conductors of an adjacent pair (Fig. 5a). In the known art, twisted pairs of perfectly centred insulated conductors have a symmetrical structure whereby the separation S_1 between the two conductors in a pair is equal to the separation S_2 between the two conductors of an adjacent pair (Fig. 5b). before "The immediate advantage".

In The Claims

Please amend claim 12 as follows:

1 12. (Amended) A twisted pair cable according to claim [1] 9, wherein said
2 elastomer is foamed.
